Double-clicking on files doesn't do anything, even though I've confirmed I have disk utility on my laptop and that it's the default application for DMG files.. Run AnyToISO once the installation is complete Click 'Browse ' and select your source.. DMG file Click 'Convert ' You now have a PC-compatible ISO image that can be burned to a CD and read.. I've also verified some of my files and have been able to open them in the past.
